Version 3.2: Quality, Performance, Reliability

LasereX Technologies Laser 3000™ Veterinary Laser: Designed to Perform

Laser therapy units are judged by their performance. The LasereX Laser 3000™ is inspired by the beauty of modern stylish design features and powerful performance. Its elegant, ergonomic design and premium product features are most noticeable; however, it is the ease of use and safety that make a statement. The soft lines of the handle indicate the subtle tones and smooth lines that influenced its style.

Performance

The Laser 3000™ is a handheld laser therapy unit that is ideal for use by vets, owners and trainers to treat injured horses, greyhounds and other animals. The unit safely delivers the required dosage (in Joules) to the injured area either by a single or cluster head containing 3 lasers.

The Laser 3000™ operates both in Continuous Wave or pulsed frequencies and is available either in visible red and / or infrared wavelengths.

Injuries treatable

The Laser 3000™ is used to treat wounds, tendons, ligaments, muscles as well as fractures and chronic injuries. Laser therapy is a drug free and pain free form of treatment improving the speed and quality of healing.

Portability

Don't let the hand held nature of the unit deceive you. The LasereX Laser 3000™ is powerful both in terms of performance and reliability. The lightweight yet strong chassis is designed to withstand all the rigors expected with everyday use, yet at the same time, creating a comfortable and user friendly design.

LasereX Technologies Manufacturing Suppliers of Quality Laser Diode Products & Solutions since 1985

Laser 3000™ Veterinary Laser

All the performance required at an affordable price

Lightweight

The LasereX Laser 3000™ is a lightweight unit weighing only 340g inc batteries and measures 205mm, thus making it easy to transport in its stylish carry case.

Attention to detail was placed into the design the Laser 3000™ in order to obtain a look that was both conventional and classy. The design of the unit is simple, clean and orderly. This is reflected in the entire Laser 3000™'s product features. Some of these are listed below.

Interchangeable Heads

The Laser 3000™ can operate either off a single head or cluster head from the same base unit. This is very convenient and time saving when treating either large or small muscle groups on the one animal.

Safety

The Laser 3000™ comes with 4 RF interlocks as well as laser safety eyewear as standard. The unit is fully compliant with International Laser Safety Standards and is FDA Approved for the Veterinary market.

Excellent OLED Screen Display Creates Visual Impact

The colour display of the OLED screen along with soft buttons, easily performs all the functions required to operate the Laser 3000™ in a visually impressive and convenient way.

Programmable Nature of Laser 3000™ allows for Convenient Storage of Treatments

The Laser 3000™ can store up to 14 programmable treatments thereby making it a straight forward and easy procedure when it comes to treating animals.

High Performing Portable Unit

The busy vet, trainer or owner requires a laser therapy that not only looks good in terms of design and features, but also delivers high performance.

The Laser 3000™ ticks all the boxes in this regard and is convenient and easy to use either in the office or out in the field.
